Application Feasibility Test Information Sheet

Filtertech or associated labs will conduct a series of tests on a sample submitted to determine an optimum treatment based upon this information sheet. After testing, a report will be sent with results before and after treatment.

- Please send (2) two gallons of a representative sample.
- Typical tests and reports require a 3-4 week testing period.
- **After testing, the before/after and unused test sample will be disposed of or sent back to the origin at Filtertech's discretion.**

ABOUT THE SAMPLE:

Today's date: _____

Facility generating wastewater, coolant or other: _____

Address: _____

Facility contact(s): _____

Phone: _____

Fax: _____ Email: _____

Please give sample description and clarity requirements:

For Process and Wastewater Applications

What type of process generated this wastewater? _____

What is the operating temperature in °F or °C? _____

Has this sample been altered since sampling (e.g. pH adjusted)? Yes/No

Volume of wastewater generated per day? _____ Gallons

Type of process: Batch or Continuous _____

Will treated water be: recycled or discharged to sewer, or other:

If multiple samples are being submitted, can the streams be combined? Yes/No If yes, at what ratio:

Does this facility have a discharge permit? Yes/No If yes, please attach with discharge limits. _____

Please describe current disposal method and items of concern:

Please provide all other relevant information including prior analytical reports, MSDS's on known cleaning agents, solvents, etc and attach to this request form with the sample.

Send samples to:
